Competitive Scholarships for Minority and First-Generation Students in agriculture, natural resources, food and nutrition, and life sciences

Scholarships: Generous tuition scholarships for students who want a challenging, research-based major to prepare for interesting careers and graduate/professional programs.

Eligibility: Students from groups traditionally underrepresented in the food, bioscience, resource, and agricultural sciences, or first-generation college students. Must be a US citizen or permanent resident. Cannot already be in the BioResource Research major at OSU.

Requirements of the MSP: MSP Scholars will major in BioResource Research (BRR). BRR requires advanced biosciences classes, choice of concentration, and a mentored research project of the student’s choice.

APPLICATION DUE DATE: MAY 18
